

## **NEW TO NDSIS**

The following is a list of new resources added to the DRUG Database;  
These resources are available to be borrowed by all ADCA members.

### **Consuming pleasures: Australia and the international drug business**

John Rainford | Fremantle Press | 2009

NDSIS Location: 362.290994 RAI

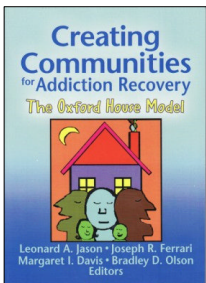

*Consuming Pleasures* traces the international and Australian history of licit and illicit drug use. It examines why we consume and what we consume, as well as the way in which consumption is regulated in the era of global free trade.

It also looks at drug use from an Australian perspective, going back to our own opium-growing industry and the racist origins of our drug laws. In doing so it considers the paradox of contemporary white Australian identity: on the one hand an image of fit, sun-bronzed athletic types at home in the surf; on the other a nation of people whose per capita drug consumption often equals and more often than not surpasses that of most other nations.

### **Creating communities for addiction recovery: the Oxford House Model**

Edited by Leonard A. Jason, Joseph R. Ferrari, Margaret Davis & Bradley D. Olson | Routledge | 2006

NDSIS Location: 362.29185 CRE

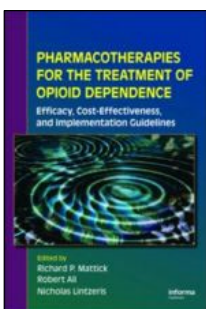

Learn to create a positive research/action alliance similar to that of DePaul University and the Oxford House community. This book reviews important research conducted in a 13-year collaborative partnership between Oxford House (a community-based, self-run residential substance abuse recovery program) and DePaul University.

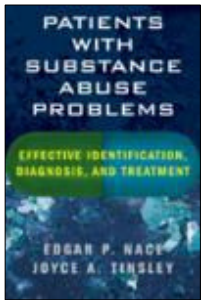

### **Pharmacotherapies for the treatment of opioid dependence : efficacy cost-effectiveness and implementation guidelines**

Edited by Richard P. Mattick, Robert Ali & Nicholas Lintzeris | Informa Healthcare | 2009

NDSIS Location: 362.293 PHA

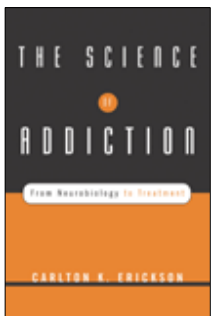

This book addresses both the management of opioid withdrawal and opioid maintenance therapy, and combines up-to-date reviews of the scientific literature with evidence-based clinical guidelines for all of the relevant pharmacotherapies.

**Patients with substance abuse problems: effective identification, diagnosis and treatment**

Edgar P. Nace & Joyce A. Tinsley | WW Norton & Co | 2007  
NDSIS Location: 616.86 NAC

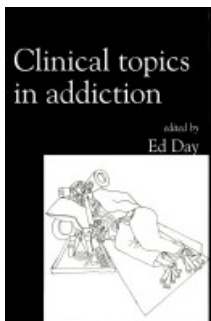

This book assembles general information on addictive disorders--how to recognize the problem, determine its depth, diagnose correctly, and treat successfully. Unlike most books on the subject that focus on specific treatment regimens, here readers will be given general tools that they can use for all patients with possible drug or alcohol abuse.

**The science of addiction: from neurobiology to treatment**

Carlton K. Erickson | WW Norton & Co | 2007  
NDSIS Location: 616.86 ERI

In *The Science of Addiction*, Carlton K. Erickson presents a comprehensive overview of the roles that brain function and genetics play in addiction. He explains changes in the terminology and characterization of addiction that are emerging based upon new neurobiological findings, thus making the reader aware of the most current research. Erickson discusses current and emerging treatments for chemical dependence, and how neuroscience helps us understand the way they work. The intent is to encourage an understanding of the body-mind connection.

**Clinical topics in addiction**

Edited by Ed Day | RCPsych Publications | 2007  
NDSIS Location: 616.860651 CLI

This work brings together 23 papers from the College's popular journal "Advances in Psychiatric Treatment", which are then updated to give systematic, authoritative and well-referenced accounts of key clinical topics relating to substance misuse. It includes papers on various substances of abuse: opioids, stimulants, hallucinogens; alcohol; and nicotine. There is a section on dual diagnosis and on investigations and psychosocial interventions.
